● Overview

The API raw material market continued to rebound this month, and purchase inquiries have gradually increased. However, due to the constraints of costs and the low supply and high prices of factories, the price range has gradually narrowed. The quotations of Neomycin sulfate and Penicillin products were high, and the market responded positively. The market transaction prices of Florfenicol, Tylosin, Tiamulin and other main products have been adjusted, which needs to be paid attention to.

● Exchange Rate

The exchange rate is stable at 1USD = 6.44RMB, 1EUR=7.80RMB.

1. Macrolide Series :

Tylosin tartrate/Tilmicosin: The supply of main factories has not been fully released with strong willingness to keep the price. Their quotations are related high and only the supply limited goods. But the market inventory consumption is slow in trade channels with negotiation to promote deals.

The market price of Tilmicosin phosphate is around USD50-55/KG, and Tylosin tartrate powder is around USD40-42/KG.

Erythromycin Thiocyanate: The supply of Intermediate grade Erythromycin thiocyanate is tight, and veterinary grade factories have raised their quotations. Both Chinese and foreign markets are highly concerned and the market deals is active.

Azithromycin: Affected by Erythromycin thiocyanate intermediates and the epidemic in India, the market for Azithromycin has attracted more attention.

2. β -lactams Series :

Amoxicillin: Affected by the epidemic in India, trade channels are reluctant to sell. Now the market prices is increasing.

Penicillin G Procaine: Penicillin industrial salt-The quotations of mainstream factories continue to be high. Due to the impact of the epidemic in India, market expects the price will increase.

3. Aminoglycosides Series :

Neomycin sulfate: The quotations of mainstream factories have gone up, the market is paying attention to it, the market inquiries and orders have increased currently, and market prices are expected to rise. Market price is around USD19.5-20.5/BOU.

Gentamicin Sulphate: Market price is around USD143-148/BOU, Factory quotations are at high level and market inquiries increase.

4. Tetracyclines Series :

Doxycycline HCL: Doxycycline delivery recently is very tight, Kunshan and Jiupeng production is limited. At present, the factory and most traders have stopped quoting. Market price is around

USD90-95/KG and price is shocked at this high levels. But Market is quite due to end user demand is slow.

OTC HCL: Market price of OTC HCL keep stable at USD14.5-15.5/KG recently. Right now market is quiet. Price and delivery is same as last month.

5. Amido alcohols Series :

Florfenicol: At present, the market price is about USD75-76/KG, the raw materials supplying is still tightly, the factories' delivery time of new order is basically in early June, but the demand at the terminal is still weak. The price trend will continue to be weak, and the price support mainly depends on the demand of end customers and materials supplying.

6. Lincomamides Series :

Lincomycin: Lincomycin price is stable at around USD49-56/BOU. The main factory Topfond still do not recover the production till now. It is estimated to keep stable in the near future if Topfond do not recover normal production.

7. Quinolones Series :

Enrofloxacin: Market price is still at a high level, and in recently weeks is stable, market price around USD29.5-30/KG, in short-term price will not change.

Ciprofloxacin: Market demand is decreasing, the cost of raw materials is still rising, the price remains stable, and market price is around USD27.5/KG.

Levofloxacin: Market is stable, price around USD38.5-39/KG.

Norfloxacin: Market is stable, price around USD35.5-36/KG.

8. Sulfonamides Series :

Sulfadiazine (sodium): At present, the factory has suspended the external quotation, the market

supply and demand is unbalanced, the current market transaction price is between USD33-34/KG, it is expected that a new wave of price increase will follow.

Sulfadimidine (sodium): The upstream supply is relatively concentrated, the market demand is large, the supply is sufficient, the current market transaction price is between USD13-14/KG.

9. Nitrofurans Series :

Furaltadone: The supplying and production from main makers are stable, lead time can be immediatly, market and price should be a smooth trend. Furaltadone market price around USD21/KG. Furaltadone market price around USD13/KG.
