Vega Daily -Vitamins 2021-08-13

Vitamin A: The market price of Vitamin A1000 in Europe is €66-71/kg now. BASF plans to update Lutavit A 1000 supply information in August 2021; sodium methoxide releases force majeure. NHC plans to shut down the vitamin A oil production unit for about 10 weeks from the beginning of July, and ZMC will stop quoting. Domestic manufacturers have stopped signing orders, market attention has increased, transactions have been active, and prices have basically stabilized.

Vitamin E: The quotation in the European market rose to €8~9/kg. Yimante will stop production and upgrade and maintain for 6 weeks in mid-September; BASF will stop quoting. The market price is basically stable, mainly based on the implementation of pre-orders. According to the purchase volume, production date and brand, the market price is wide ranging from \$9.5~10/kg.

Niacinamide/niacin: According to different brands and

production dates, the market price is \$6.2~6.5/kg.

Vitamin B2: There are a large number of domestic B2 manufacturers, and import manufacturers also sell vitamin b2. The domestic market FOB price is \$12-13/kg, the European price is €13~14/kg.

Vitamin D3: European market price is broadly €12.75~14/kg. The domestic market is relatively calm, quotations are \$12-13/kg, and some prices are slightly lower.

Calcium pantothenate: The European market price is stable at €9.5-10/kg. Major domestic manufacturers sign orders in limited quantities, and the market price is around \$11-12/kg, which is for reference only, and there are a small amount of low-priced sources in some factories. On April 6, DSM increased its offer of calcium pantothenate by 40%. Vega foresee the prices of D-calpan will uprising, due to materials price are uprising, but will not sharply uprising.

Biotin: European 2% biotin offers a wide range of €6.0~6.5/kg.

Recently, the factory's preliminary orders have been implemented one after another, and the China domestic price has basically stabilized at around \$8~9/kg. Pay attention to the production and delivery of the factory in the later period.

Vitamin C: The domestic supply of vitamin C is slightly loose, and the market price pulls back slightly.

Inositol: The recent market supply of inositol is slightly tight, and the market price is relatively high.

Vitamin B6: The recent market price is around \$17~18.5/kg, and the price of some brands is lower.

Vitamin B1: The recent market inquiry and procurement have been basically stable, and the market price has been steadily weakening. The market price is \$30~32/kg for Vitamin B1 HCL ; Vitamin B1 MONO market price is \$21~22/kg in August.

Vitamin K3: MSB market price is around \$11~13 in August, Vitamin K3 market price is around MNB \$12.5~13.5kg in August.

Folic acid: The price of raw materials has risen. China market prices are around \$37~40/kg.

Vitamin B12: The vitamin B12 market has been quiet recently and the price has been stable.

Choline Chloride: Supported by the rising raw material ethylene oxide, the negotiated price rose slightly. This week, the production and sales of choline chloride plants remained relatively balanced, and the lack of follow-up demand from downstream feed factories dragged down the market

Ethylene Oxide Fundamentals: Ethylene oxide, production and sales maintain a tight balance, and market prices continue to rise
