**Vitamin A:** The market price of Vitamin A1000 in Europe is €69.50-72.50/kg now. BASF updated its supply information at the end of August. The VA 1000 is currently regaining its quality, but it is still unable to provide the saleable quantity. It is expected to update the saleable quantity information in 4-6 weeks. NHC plans to stop production for about 10 weeks from the beginning of July on the vitamin A oil production unit. Zhejiang Pharmaceutical has stopped reporting, and NHC will offer \$52/kg.

**Vitamin E:** The quotation in the European market rose to €8.20~8.70/kg. Manufacturers stop quoting and mainly send pre-orders. Emantel will stop production for 6 weeks in mid-September for upgrades and maintenance; BASF stops quoting globally. According to different purchases, production dates and brands, the market price is wide ranging from \$11~12/kg.

**Niacinamide/niacin:** According to different brands and production dates, the market price is \$6.2~6.5/kg.

**Vitamin B2:** There are a large number of domestic B2 manufacturers, and import manufacturers also sell vitamin b2. The domestic market FOB price is \$12-13/kg, the European price is €13~14/kg.

**Vitamin D3:** European market price is broadly €11.50~13.50/kg. Huayuan Bio-Jinxi Science and Technology Park suspends production and technical transformation, which is expected to be completed by the end of September 2021. Vitamin D3 will resume at \$52/kg on September 10, and domestic manufacturers' willingness to ship shipments has declined. Some traders stopped reporting and wait-and-see, and market quotations increased slightly

**Calcium pantothenate:** The European market price is stable at €9.5-10/kg. Major domestic manufacturers sign orders in limited quantities, and the market price is around \$11-12/kg, which is for reference only, and there are a small amount of

low-priced sources in some factories. On April 6, DSM increased its offer of calcium pantothenate by 40%. Vega foresee the prices of D-calpan will uprising, due to materials price are uprising, but will not sharply uprising.

**Biotin:** European 2% biotin offers a wide range of €6.0~6.5/kg. Recently, the factory's preliminary orders have been implemented one after another, and the China domestic price has basically stabilized at around \$8~9/kg. Pay attention to the production and delivery of the factory in the later period.

**Vitamin C:** The domestic supply of vitamin C is slightly loose, and the market price pulls back slightly.

**Inositol:** The recent market supply of inositol is slightly tight, and the market price is relatively high.

**Vitamin B6:** The recent market price is around \$17~18.5/kg, and the price of some brands is lower.

**Vitamin B1:** The recent market inquiry and procurement have been basically stable, and the market price has been steadily

weakening. The market price is \$30~32/kg for Vitamin B1 HCL ; Vitamin B1 MONO market price is \$21~22/kg in August.

**Vitamin K3:** MSB market price is around \$11~13 in August, Vitamin K3 market price is around MNB \$12.5~13.5kg in August.

**Folic acid:** The price of raw materials has risen. China market prices are around \$37~40/kg.

**Vitamin B12:** The vitamin B12 market has been quiet recently and the price has been stable.

**Choline Chloride:** Supported by the rising raw material ethylene oxide, the negotiated price rose slightly. This week, the production and sales of choline chloride plants remained relatively balanced, and the lack of follow-up demand from downstream feed factories dragged down the market

**Ethylene Oxide Fundamentals:** Ethylene oxide, production and

sales maintain a tight balance, and market prices continue to rise
