Vega Daily -Vitamins 2021-10-20

Vitamin A: The market price of Vitamin A1000 in Europe is €69.00-74.00/kg now. The quality of the VA 1000 at BASF's German plant has recovered, but the saleable quantity is not yet available. The information is expected to be updated in mid-November. DSM reduced production by 30% in the fourth quarter. Domestic manufacturers mainly implement pre-orders, and prices follow the market.

Vitamin E: The quotation in the European market rose to €8.90~9.60/kg. Manufacturers stop quoting and mainly send pre-orders. Emantel will stop production for 6 weeks in mid-September for upgrades and maintenance. Market news said that the supply of vitamin E raw materials is tight. NHC quoted \$14.20/kg on October 18, and the purchase inquiry increased. According to the purchase volume, production date and brand, the market price rose broadly by \$12.30~13.75/kg.

Niacinamide/niacin: According to different brands and

production dates, the market price is \$6.2~6.5/kg.

Vitamin B2: There are a large number of domestic B2 manufacturers, and import manufacturers also sell vitamin b2. According to different brands and production dates, the market price is \$13.00~14.47/kg., the European price is €13.25~14.00/kg.

Vitamin D3: European market price is broadly €14.50~16.50/kg. Huayuan Bio-Jinxi Science and Technology Park suspends production and technical transformation, which is expected to be completed by the end of September 2021. Vitamin D3 will resume at \$52/kg on September 10, The quotations of \$14.47~15.92/kg are for reference only, and low-priced goods are limited.

Calcium pantothenate: The European market price is stable at €10.00-15.00/kg. Major domestic manufacturers sign orders in limited quantities, and the market price is around \$12.30-13.75/kg, which is for reference only.

Biotin: European 2% biotin offers a wide range of €6.8~7.5/kg. Recently, the factory's preliminary orders have been implemented one after another, and the China domestic price has basically stabilized at around \$10.85~12.30/kg. Pay attention to the production and delivery of the factory in the later period.

Vitamin C: The domestic supply of vitamin C is slightly loose, and the market price pulls back slightly.

Inositol: The recent market supply of inositol is slightly tight, and the market price is relatively high.

Vitamin B6: The recent market price is around \$24.60~27.50/kg, with limited low-priced sources; later, pay attention to the supply of new manufacturers.

Vitamin B1: Recently, market inquiry and procurement have been basically stable. Due to cost pressure and production pressure, Tianxin Pharmaceutical's quotation was \$27.50/kg on October 18, and the market quotation was stable and strong.

Vitamin K3: Raw materials are in short supply and production costs have risen sharply. K3 manufacturers' quotations have been raised, and market prices have rebounded.

Folic acid: The price of raw materials has risen, and manufacturers' export quotations have been high.

Vitamin B12: The vitamin B12 market has been quiet recently and the price has been stable.

Choline Chloride: Supported by the rising raw material ethylene oxide, the negotiated price rose slightly. This week, the production and sales of choline chloride plants remained relatively balanced, and the lack of follow-up demand from downstream feed factories dragged down the market

Ethylene Oxide Fundamentals: Ethylene oxide, production and sales maintain a tight balance, and market prices continue to rise
