## Catalogue

### 1. Vitamins:

- 1) Vitamin A
- 2) Vitamin D3
- 3) Vitamin E 50% CWS /VE Oil 98%
- 4) Vitamin C/Coated 97/DC97
- 5) Vitamin B1 Mono/Hcl
- 6) Vitamin B5/D-Calcium Pan.
- 7) Folic Acid
- 8) Biotin 98%

### 2. Sweeteners

- 1) Glucose series
- 2) Erythritol
- 3) Aspartame
- 4) Sucralose
- 5) Saccharin Sodium

### 3. Acidulants

- 1) Citric acid series
- 2) Taurine
- 3) DL-Malic acid

### 4. Preservatives

- 1) Sorbic Acid /Potassium Sorbate
- 2) Sodium Benzoate

### 5. Antioxidants:

- 3) Sodium Erythorinate
- 4) Sodium Ascorbate

### 6. Other products

- 5) Coenzyme Q10
- 6) Inositol

## Vitamins

### Vitamin A

The News from DSM, Production Output for Q4, 2021 will cut down to 70%, now DSM have reverted to producing and they will revert to supply to each market from the beginning 2022. Market price will hold stable in Dec., and market dealing inactive than before. For the VAP250, the price is at about USD25-29/kg, and the price of Vitamin A 1.7 Miu still at about USD100/KG.

### Vitamin D3

The market price of D3 increased a few and hold stable recently. Market enquiries are more than before, but order dealing inactive than last month. The current price of VD3 100CWS is at about USD13-16.5kg, and the price of VD3 40MIU at about USD3000/kg.

### Vitamin E 50% CWS /VE Oil 98%

The Market price is stable. Market dealing inactive than before. The current price for VE 50% CWS is about USD17/KG, and the price of VE Oil 98% is USD22.5-23.5/Kg.

### Vitamin C/Coated 97/DC97

The market price of Vitamin C increasing a lot in Oct. , and the manufacturers increased the price to USD8/kg. now market price of Vitamin C is about USD6-7/KG FOB China. Paying attention next actions of Manufacturers in Dec., the manufacturers maybe will keep price increasing again .

### Vitamin B1 Mono/Hcl

Main manufacturers quote almost same. Market intend to be stable now. At present new order mainly consume the stock materials. Market price is expected to keep stable later period. The current price for VB1 Mono is around USD25-26/KG, and VB1 Hcl is around USD35/KG.

### Vitamin B2 98%

Due to electricity decreased using and lack of materials the B2 factories are rising a lot. The current pricing is around USD 52-58/KG depending brand and quantities.

### D-Calcium Pan./Vitamin B5

Some of factories' production capacity are shortened due to local government policy, there price is keeping very strong, right now the pricing is around USD16-18/kg, and the price of main manufacturers is higher.

### **Folic Acid**

Raw material of Folic Acid market price trend to be more stable. Main manufacturers has maintained the market price for a period, thus market price is gradually stable in later period. Food grade Folic Acid price is above USD 55/kg.

### **Biotin 98%**

NHU raised the prices in the market several days ago and the transactions are being very active, the spot products are keeping consumed and right now the market price is about USD 450-500/KG or more, very sensitive now.

## **Sweeteners**

### **Glucose series**

Glucose keep in high level in Nov and a little higher than Oct. Mono price about 750USD/mt fob and anhydrous about 880-900USD/mt. Suggest buy as demand.

### **Erythritol**

The manufacturers' supply of erythritol still keeps tight. With the entry of new manufacturers, the current market price dropped to around USD 4/KG.

### **Aspartame**

The factory's productivity is insufficient, and there is little goods supply on the market with tight delivery. Current market price is around USD 22-25/KG.

### **Sucralose**

The price of raw materials raised much, so that the all manufacturers raised the price of Sucralose much .The current market price raised to around USD65/KG.

### **Saccharin Sodium**

Affected by environmental protection and production safety issues and the rising price of raw materials, manufacturers have increased their quotations, and it is expected continue to rise in the future. The current market price of is around USD8.8/KG.

## **Acidulants**

### **Citric acid series**

Citric acid price keep rising and delivery time more tight than before, new delivery time already in Q2 of year 2022. Current offer of CAA 2200-2300usd/mt FOB, CAM at about USD2100/mt, sodium citrate 2200-2300. Very hard to get stock in market, suggest buy ASAP for any need and price trend will keep in high level recently.

### **Taurine**

The price of raw material ethylene oxide has dropped slightly. However, due to the tightness of goods and the relatively good demand from customers in various countries, the price of taurine is currently stable. The main factory delivery date is in January next year. The price is around USD 4.1-4.3/KG. The price is expected to be stable in the short term. The next price trend is related to factory production conditions and market demand conditions.

### **DL-Malic acid**

The price of DL-Malic acid is keeping raising, now the FOB price is around 3500-3550usd/mt, delivery need to be at the end of december, even some brand need to be the May 2022, so the price is expected to remian in the near future.

## Preservatives

### Sorbic Acid /Potassium Sorbate

Affected by the increase in the price of raw material glacial acetic acid and the domestic curtailment of electricity production and the dual control of energy consumption, the current price of potassium sorbate and sorbic acid are keep rising, and the delivery of various manufacturers is tight. Now the price of potassium sorbate is about USD5.95/kg, sorbic acid is about USD7.2/kg.

### Sodium Benzoate

The price of sodium benzoate has dropped slightly, now it is about 2.05USD/KG.

## Antioxidants

### Sodium Erythorlate

Delivery is tight and already arranged at January 2022, market about USD3.6-4/kg FOB.

### Sodium Ascorbate

The market for sodium ascorbate now remains stable.

## Other Products

### Coenzyme Q10

At present, Q10 price is stable. Mainstream manufacturers offer at USD500 FOB. Market transaction price is slightly lower. New brands price is lower. Advise to buy against the current demands.

### Inositol

After a rapid increase in the previous period, the current market price is basically stable at USD19-22/KG. Raw materials are still in short supply, and the delivery is also very tight. The delivery time of major factories is basically in January 2, and the delivery time of individual factories has been scheduled to the second quarter of next year. Market prices are expected to remain firm.
