

**Methyl Folate** is known as calcium salt L-5-methyltetrahydrofolate(L-5-MTHF) , the same form of folate found in nature, Compared the normal folic acid , with following advantage :

- 1.Absorb directly and efficiently , no need metabolism.
- 2.The only folate source for thr 30%-70% individuals with bad gene of MTHFR c677T CT and TT type.
- 3.A safer folate source, especially for pregnancy.

We Vega can supply this material with competitive quality in following tips

- 1.The most stable active folate 3 years stability at room temperature.
2. Purest active folate on the planet.
- 3.The most active natural folate with stability data to support it.

We trust using methyl folate is a more healthy and inevitable trend of scientific and technological progress.

## Methyl Folate

Folate in **natural** form & Ideas for a healthy pregnancy

**What Is Methyl Folate?**

- L-5-methyltetrahydrofolate (L-5-MTHF)
- Form of folate found in nature.

**Why Choose Our Methyl Folate?**

- Direct absorption without metabolism
- Individuals with MTHFR gene can also absorb and utilize
- Safer to protect normal metabolism
