WEGA DAILY

Vega, China Vitamins Manufacturer

VITAMINS TO VEGA

9TH, AUG, 2023

01) Vitamin | Vitamin D3

Garden Biochemical recently said in the face of investor questions: the company continues to promote the "one vertical and one horizontal" development strategy, vertical cultivation of the whole VD3 industry chain, has developed into a leading enterprise in the global VD3 industry, and established a stable strategic cooperative relationship with the world's well-known customers. In order to give full play to the synergistic advantages of the company's channels and technologies, the company has horizontally developed vitamin products such as VA, VE, VB6 and biotin.

02 Amino acid | Valine

At present, the manufacturer's price continues to be weak, the market is mainly negotiated, the trade market price is USD2.12-2.37/KG, the customer's psychological expectation target price is relatively low, the transaction is less, the low content valine price continues to be weak, and the factory production and supply situation is concerned in the later stage.

03 API | Oxytetracycline

Oxytetracycline, oxytetracycline hydrochloride, weak downstream market demand, factory prices continued to fall in the first half of the year. Oxytetracycline, the current market price is about USD8.75-9.1/KG, currently in the stage of inventory consumption, follow up the situation of raw materials and strong trend; Oxytetracycline hydrochloride, some factories stopped production for maintenance, the market price of USD10.85-11.5/KG, the recent market price is low and stable

04) Food additives | L-Carnitine

Recently, some manufacturers stopped production for maintenance, market demand is stable, L-carnitine hydrochloride price has adjustment, the export market transaction price is about USD17/KG. Prices are stable in the short term and we will continue to monitor the market.
