Vega, China Vitamins Manufacturer

News

1 Vitamin

Zhejiang Garden recently announced in the face of investors' questions: the company continues to promote the "one vertical and one horizontal" development strategy, vertically cultivates the entire VD3 industry chain, has developed into a leading enterprise in the global VD3 industry, and has established stable relationships with world-renowned customers strategic partnership.

2 Amino Acids | Valine

At present, the prices of manufacturers continue to be weak, and the market is dominated by bargaining. The trading market quote is US\$2.45/KG, and the target price is low in customers' psychological expectations, and the transaction is rare. Pay attention to the production and supply situation of the factory in the later stage.

3 API

For oxytetracycline, the demand in the downstream market was weak, and the factory price continued to drop in the first half of the year. Oxytetracycline, the market price is about USD9.15/KG, and is currently in the stage of depleting inventory; Oxytetracycline hydrochloride, some factories are shut down for maintenance, and the market price is USD11.6/KG, and the recent market price is low and stable.

4 Food Additives | L-carnitine

Recently, some manufacturers stop production for maintenance, the market demand is stable, the price of L-carnitine hcl has been adjusted, and the transaction price in foreign markets is around USD 17 /KG.
