Vega, China Vitamins Manufacturer

News

1 Vitamin | Vitamin B3

The price of niacin/nicotinamide continued to weaken this month, the quotations of the factory were lowered, and the traders rushed to ship. The current mainstream transaction price in the market is around USD5.58/KG, and the export transaction price is around USD5.3-5.6/KG. The quotation is slightly higher from producer.

2 Amino Acids | Lysine

According to market information, Shouguang Golden Corn has increased the external quotation of lysine: FCA price of 70% Lysine is usd775/mt, the FCA price of 98% Lysine is usd1275/mt.

3 API | Oxytetracycline hcl

For oxytetracycline and oxytetracycline hydrochloride, the demand in the downstream market was weak, and the factory price continued to fall in the first half of the year. Oxytetracycline, the current market price is around usd8.88/kg. It is currently in the stage of depleting inventory. Follow-up attention will be paid to the situation of raw materials and doxycycline trends. Oxytetracycline hydrochloride, some factories are shut down for maintenance, the market price is usd10.6-11.2/kg, the recent market price is low and stable, it needs to continue to pay attention to raw materials and market changes.

4 Food Additives

A few days ago, Vivici, a B2B raw material company in the Netherlands, has successfully completed a seed round of financing to bring its precision fermented milk protein, a dairy raw material that does not contain animal ingredients, to the market. Vivici, a joint venture launched last year, is conceived as a brand that can leverage the intellectual property developed from years of collaboration between DSM and Fonterra to accelerate fermented dairy ingredients and commercialization.
