Vitamins to VEGA!

Vega, China Vitamins Manufacturer

News

1 Vitamin | Vitamin C

Recently, the VC market has been bottoming out, and the price has hit a new low. In June, DSM released the closure of the VC production base of Jiangshan Pharmaceutical, which seems to have no impact on the VC market. Overall, the manufacturers are still overcapacity, capacity continues to superposition, demand is not prosperous. Since the beginning of this year, the VC price has been going down, and the export price is about USD2-2.2/KG.

2 Amino Acids | Lysine & Threonine

According to the market news: Chengfu Group amino acid latest offer: 70% lysine USD775/MT, threonine USD1360/MT, the specific transaction price according to the shipping distance set, limited order. Recently, due to the rising cost of raw materials, the superimposed market supply is tight, and the price of lysine manufacturers continues to run strongly.

3 API | Lincomycin hydrochloride

The recent price is stable, although the factory is stopped for maintenance, but the supply is sufficient. Earlier, the factory had raised prices slightly. The current export quote is USD34.5-35/BOU. Follow up on factory resumption.

4 Food Additives | D-Ribose

Recently, the food additive D-ribose is affected by market demand, and the transaction price in the export market is about USD9.5/KG, and the price of D-ribose is stable in the short term.
