Vitamins

The vitamins market continues to be weak, and the overall transaction is not prosperous. Some varieties of vitamins factories intend to raise prices, but the market feedback is not positive, DSM VE adjusted the domestic offer to USD8.6/KG, B1 factory is concentrated stop signing stop reporting. Calcium pantothenate, nicotinamide and other varieties fell slower. VK3 price has entered the bottom, with signs of stabilization.

Amino Acids

Last week, methionine manufacturers stopped reporting and signing, mainly to deliver early orders, and the trade market price was between USD2.4-2.46/KG, but the market turnover was not much for the time being; The overall threonine market is strong, the market supply is tight, the export market inquiries increase, the factory quotation increases, and the factory signing situation is concerned in the later stage. Last week Lysine market stabilized, the industry started to recover, the overall supply capacity of the market increased, and the factory shipments were concerned in the later stage.

API

Last week, the overall market for veterinary drug raw materials remained weak and stable, with average demand. Price competition between florfenicol plants continues, with a sharp drop last week. Doxycycline, amoxicillin, trade channels negotiate and finished some order. Tylosin, Tilmicosin, the price remained stable, Albendazole, the early price low operation, this week the price rebound, continue to pay attention to the market changes.

Food Additives

The food sector as a whole showed an upward trend last week. Affected by raw materials, the price of sweetener series products: sucralose/aspartame/Acesulfameae increased; The nutritional fortification agent taurine was affected by the rising price of the raw material ethylene oxide, and the factory cost increased and the price increased. The L-carnitine series is hot, and the factory schedules production and delivery around the beginning of October, and the price is currently stable.
