

VEGA DAILY

Vitamins to VEGA!

Vega, China Vitamins Manufacturer

09th, Oct, 2023

Vitamins

After the Chinese National holiday, the market of Vitamins is stable. Some customers were placing orders before the holiday. VB1 continues to stop reporting and transaction slowly upward; Domestic market is temporarily stable.

Amino Acids

Lysine hcl manufacturers' offer before the holiday is mostly stable while Lysine sulphate market is slightly weak. The market price of Threonine is over USD1600/MT and some customers already accept and signed orders at this price; DL-methionine factory stopped offer before the holiday, the market price is still strong as the tight supplyment. Evonik is going to reduce the production in Q4, market expect the price will still keep strong.

API

During the National Day, the veterinary drug raw material market basically maintained the overall trend of weak operation, which was mainly affected by the imbalance of supply and demand. Albendazole, Colistin Sulfate, the current price is relatively strong, and the factory price has been raised slightly.

Food Additives

Recently, due to market demands and rising raw material costs, the transactions of L-carnitine has risen sharply, and the transaction price of foreign markets is about USD16-16.5/KG. Some domestic manufacturers have suspended quote. Will continue to pay attention to the market.
