## Vitamins to VEGA!

17th Oct, 2023

01

### Vitamin

Hubei Truevita responded to the national call and proposed and drafted the group standards "Acetyl L-Carnitine Hydrochloride" and "L-Carnitine Fumarate", which were approved and released by the National Group Standards Information Platform of the National Standards Committee in 2023.

02

### Amino Acids | Threonine

There are relatively few orders signed by end users, the demand is weak, back-to-back purchases can be made as needed, and the market supply is normal. The export price is around USD 1,500/T. The market price of threonine is expected to remain stable in the future. Pay attention to the factory's external quotations.

03

### API

The price of enrofloxacin/ciprofloxacin hydrochloride is low and stable. The recent market demand is average, the factory supply is sufficient, and the price has dropped slightly. The market quotation is around USD23 for enrofloxacin and USD22.2 for cyclomycin hcl.

04

### Food Additive

Recently, the food additive aspartame has been affected by market demand and raw material costs. The domestic market transaction price has been adjusted to about USD 12/KG. It is expected that prices will continue to remain stable in the future.
