VITAMINS TO VEGA

1st, Nov, 2023

01 Vitamin | Niacin&Nicotinamide

On 25th October 2023, the EU Food Safety Authority (FSA) published an assessment of the application for the renewal of the authorisation of niacin and nicotinamide as additives to all animal feeds, after which the Panel concluded that the additives are safe for all animal species, consumers and the environment under the conditions of authorised use, and that there is no need for an assessment of the efficacy of the additives in the context of the renewal of the authorisation.

02 Amino acid | Valine

Domestic factory offer down, trade market price between CNY 19-20/KG, export price between USD2.2-2.3, market turnover is general, end-users replenishment is relatively cautious, it is expected that later valine market prices run weakly.

03 API | Doxycycline Hydrochloride

After Nanjing API Fair the mainstream manufacturers to resume production offer, the recent price trend is a downward trend, and the recent demand for low and terminal wait-and-see more, no inventory space, the current offer of 350 CNY / KG, please pay attention to the subsequent price trend.

04 Food additives | Glycine

Recently, the transaction price of food grade glycine in domestic market stabilised to around 13.5-14 CNY/KG. The transaction price in foreign market is around 1.65 -1.7 USD/KG. At present, the domestic factory delivery is stable, and the subsequent price is expected to remain stable.
