

VEGA DAILY

VITAMINS TO VEGA

Vega, China vitamins manufacturer

10th Nov. 2023

Vitamin

vitamin: Recently, the market of vitamin B6 has been a bit weak. After two price increases in the early stage, the transaction price increased up. After that, the factory held up prices for a period, but market demand and overall transactions were slightly weak. So the current market quotations are wide, around USD17.8-18.5/kg.

Amino Acid

Recently, the market of tryptophan has been relatively weakly. The demand is average and most clients are purchasing on demands. In the short term, the trend behind tryptophan is expected to be weak.

API

For doxycycline hydrochloride, mainstream manufacturers stopped reporting and offering after the CPHI in Barcelona, Spain. It is expected that terminal demand may be growing. Also, there are the low inventories in the market, so the price may increase in future. The current market price is around USD44.5-46.5/KG.

For taurine, due to the influence of raw materials, the factory price has been raised three times since the fourth quarter, the increase is more than 1usd. The current demand is relatively positive, the market price is around USD 2.5-2.8/KG.

FOOD ADDITIVES

Affected by market demand, the price of sorbic acid has stabilized. Most domestic manufacturers quote around USD 3.5-4.2/KG. The price is expected to be stable in near future.
