Vitamins

Vitamins: This week, the vitamin market changed little demand remains weak, and prices of many products are at low levels. VE manufacturers domestic price increases, the market is expected to stabilize and stop falling; B1 mainly consumes market inventory, and the transaction price moves upward.

Amino Acids

Valine's domestic factory quotation fell since end of Oct, the market price is between 2.4/KG. Due to the weak market trend, customers' lower purchasing demand, market transactions are relatively weak.

Last week the factory stopped to sign, the late trend to pay attention to market transactions.

API

Compared with the trend of weak operation in the early stage, the market situation of veterinary drug raw materials improved last week. Chinese domestic market feedback is more positive as the inquiry increased. At the same time amoxicillin, Colistin sulfate prices also remained firm.

Later price trends still need to pay attention to market demand and factory production.

Food Additives

Sucralose/aspartame/Acesulfame prices maintained, market inquiries increased, stable and normal shipments; Creatine monohydrate is affected by raw material control and the price rises, and some mainstream manufacturers still stop reporting the market transaction price of about USD8.7/KG, and the follow-up continues to be bullish.
