VITAMINS TO VEGA

22th, Nov, 2023

01 Vitamin

The niacin/niacinamide factory has resumed quotation and raised the price to USD4.6/KG. Last Wednesday, since the B3 factory suddenly stopped reporting, but still some low-price inventory in the market, domestic market became very active, and strong transactions. This time B3 bottomed out and rebounded mainly due to the influence of raw materials, supply and demand, etc., and the subsequent judgment is that it will be stable and slightly rising.

02 Amino acid

Recently, the threonine market has been relatively stable, with end users purchasing on demand. The tryptophan price is high, but the price is at a high level.

03 API

Heilongjiang Lianshun Biotechnology Co., Ltd. invested 980 million yuan in the construction of enzymatic amoxicillin and ampicillin projects.

04 Food additives

Recently, the prices of L-carnitine series products have increased across the board. The transaction price of L-carnitine HCL has stabilized at around USD22/KG. It is expected that there will still be an upward trend.
