01 Vitamin

Vitamin B6: On November 29, Tianxin increased the price offering; as the vitamin forum approached, many factories begun to raise prices or stopped reporting. B6 has been running weakly before, and market transactions was quite average. Recently, the market has stabilized and there are signs of rising, so we will pay attention to factory quotations in the future.

02 Amino acid

Threonine: The market transactions are not strong, inquiries are average, the market quotation is around USD1525-1540/MT, end customers are mainly purchasing according to demand, so the overall market is running weakly.

03 API

Fuxiang Pharmaceutical announced on the evening of December 4 that it plans to issue stocks to specific targets through the GEM simplified procedures, with the total amount of funds raised not exceeding 300 million yuan, which will be used for new projects with an annual output of 5,000 tons of carboxylic acid series products and to supplement working capital.

04 Food additives

Aspartame: Recently, affected by market demand. The transaction price of food additive Aspartame in foreign markets is about USD10-10.5/KG. It is expected that the price will continue to remain stable in the future.
