Vitamins to VEGA!

19th. Dec. 2023

01

Vitamin | B5 (Calcium pantothenate)

Affected by the imbalance between supply and demand in the market, the price of calcium pantothenate has stabilized at a low price, which is the lowest in history in recent years. The current market price is USD6.9-7.3/kg, and it is expected that the market price has stabilized and weakened in the near future.

02

Amino Acid | Methionine

It is understood that CUC methionine production plant plans to carry out a 4-5 week shutdown maintenance work in the second quarter of 2024. Recently, the domestic solid methionine delivery is tight, the spot is less, the factory external quotation is firm, and the market is expected to be strong in the later period.

03

API

Tylo-tymycin, Tymicosain: The recent market heat is general, the market inventory slowly accumulated, mainly related to the coming of Christmas, market reference price: Taylors is around USD30.5/KG, Timicosin phosphate is around USD33.4/KG, Timicosin is around USD40.2/KG, Tevanistin is around USD58.3/KG, and tyamicin is around USD20.1/KG.

04

Food Additive

Recently, affected by the market prices of L-carnitine series products rose across the board, and the transaction price of L-carnitine BASE mainstream manufacturers was stable at about USD20-21/KG. It is expected to continue to show an upward trend, and we will continue to pay attention to the market.
