

## Vitamins

Vitamin market fluctuations, the domestic procurement and marketing activity, exports affected by the Christmas holidays, inquiries to reduce. VB1 factories limited signing orders, row of goods continued to be tense, the market turnover strengthened; VK3 factories to stop the report after the price increase. The supply is tense, the customer in advance of the order to lock the goods; VB5 prices almost on the bottom price, end-users to actively purchase; VC

manufacturers continued to stop offering. the market muffled, the transaction gradually price shifted upward.

## **Amino Acids**

This week Lysine and Threonine market price slightly downward, the overall market transaction is general, Lysine export factory external offer around USD1.22/KG, Threonine external offer around USD1.45/KG, transaction price tends to be weaker, the market price is weakly adjusted, methionine high and stable.

## API

This week, the veterinary market as a whole remained stable operation, the price of some products rose slightly in the early stage, but the overall supply exceeds demand, the market is still mostly wait-and-see, to maintain on-demand procurement. Prednisolone, Florfenicol price is stable, individual florfenicol factory delivery has been scheduled to February; Levamisole hydrochloride, enrofloxacin, mucin sulfate prices are relatively firm; lincomycin due to the plant shutdown, the recent price increase; follow-up continued to pay attention to market changes!

## **Food Additives**

The overall trend of food additives is stable, the price of creatine monohydrate remained stable this week, the mainstream manufacturers continue to stop reporting, is expected to be able to deliver after February, the market price of 8.9usd/kg, the follow-up continued to rise; L-carnitine series of products this week, prices remained stable, it is expected that the subsequent price of the price of the rise; preservatives prices slipped slightly. Follow-up continue to pay attention to the delivery situation of the factories.
