## API

03

Etymomycin and Hygromycin Hydrochloride, the market is low and stable, and the factory prices continue to go down in the 23rd year. Hygromycin, the current market price of about 9usd/kg; Hygromycin Hydrochloride, the market price of 11.2usd/kg, the recent market pattern of low and stable, the subsequent need to continue to pay attention to the adjustment of the factory offer and market demand changes

## FOOD ADDITIVE

04

The first production and operation licences for GM corn and soybean seeds were issued; the first production and operation licences for GM corn and soybean seeds were approved a month ago, following the approval of 51 GM corn and soybean varieties through the National Variety Validation. A number of listed seed companies and bio-breeding experts believe that this is a very important step for the commercialisation of GM and the development of bio-breeding technology.
