VITAMIN

01

According to market news, on January 8, DSM increased the price of feed-grade vitamin 50% powder to USD8.5/KG.

AMINO ACID

02

From January 8, 2024, the price of CUC methionine products will increase by 5%. Recently, the methionine factory has raised the price to stimulate the market delivery progress, but as the current methionine price is at a relatively high level, the market sentiment for signing new orders is not high, and users purchase is more depending on demand.

API

03

On January 8, 2024, according to the announcement of the State Intellectual Property Office, Zhejiang Jiuzhou Pharmaceutical Co., Ltd. obtained a preparation method of Sitagliptin intermediate Compound. The patent abstract shows that the invention relates to the field of pharmaceutical synthesis, and relates to a preparation method of sitagliptin intermediate compound. The intermediate compound was prepared by activation and condensation reaction.

FOOD ADDITIVE

04

Recently, Yihai Kerry (Shanghai) integrated food industry base project environmental impact report form to be approved and publicized. According to reports, the proposed project is located in Gaodong Town, Pudong New Area, mainly engaged in food production, food business and other services, including the production of frozen food such as steamed buns, fried pasta such as fried dough sticks, convenience food in room temperature rice and rice balls, a total investment of 2.43 billion yuan.
