Vitamins to VEGA!

15th. Jan. 2024

## VITAMIN

01

The vitamins market fluctuated to the upside this week. VB1, VC with the market inventory consumption, low price supply reduced, transaction up; VE, folic acid, B12 manufacturers raised prices, a small rebound; VA, VD3 manufacturers centralized stop, the market tentative transaction price went up.

## AMINO ACID

02

On January 12, 2024, according to the latest offer of Chengfu Group: 70% lysine offer increased by USD25/MT, the specific transaction is based on the transport distance, and the priority is to supply long-term stable customers. Last week, the overall market turnover was general, the purchase and sales were light, the end user replenishment sentiment was not high, the market expected lysine sulfate in the early stage was weak, the willingness to sign the order was not strong, and the price of other factories was concerned in the later stage.

## API

03

This week, the overall trend of API is maintain weak and stable, most of the price of varieties supported by the cost, the decline space is limited, the factory supply is normal, and the trade channel is cautious. Doxycycline, florfenicol was stable last week, the market negotiated. Enrofloxacin prices are strong. Tylomycin, Albendazole prices are weak running, oxytetracycline, amoxicillin, etc. remain stable.

## FOOD ADDITIVE

04

This week, the food plate as a whole showed a stable trend, and the price of sweetener series products sucralose/aspartame/Acesulhoney remained stable and shipped smoothly and normally. Creatine monohydrate price remained stable this week, the next 2 months will show a downward trend; L-carnitine series product prices remain stable this week is expected to subsequent prices will be pulled up; Preservative products sodium benzoate/potassium sorbate series products due to the impact of market demand to maintain a stable price, long-term bullish line, continue to pay attention to the delivery of each factory.
