Vitamins to VEGA!

1st. March. 2024

VITAMIN | Choline Chloride and Vitamin E 01

For Choline chloride, the raw material trimethylamine remained stable as before, and ethylene oxide was slightly increased, which had little impact on choline as a whole. The export price of choline chloride 60% powder is USD570-600/MT FOB, the price is expected to remain stable or slightly up in the short term, and the following is mainly concerned about the raw material situation.

According to the domestic market news, on February 29, ZMC feed grade 50% powder vitamin E suspended the quotation, is expected to resume the quotation next week.

AMINO ACID | Methionine 02

The European market price increased slightly, the domestic trade market price is between USD2.7-2.8/KG, the price is at a high level, the transaction is reduced, the factory is mainly delivered, the liquid methionine manufacturer's price is stable, Adisseo liquid methionine routine maintenance plan opens this week, later pay attention to the factory order.

API | Oxytetracycline 03

For Oxytetracycline and oxytetracycline hydrochloride, the market is low and stable, and the factory price continues to fall. For oxytetracycline, current market price USD8.5-8.85/KG; For oxytetracycline hydrochloride, the market price USD10.25-10.75/KG, the recent market pattern is low and stable, the subsequent need to continue to pay attention to the adjustment of factory quotation and market demand changes.

FOOD ADDITIVE | Saccharin sodium 04

Recently, the food additive saccharin sodium is affected by market demand, and the transaction price in the export market is about 4.7-5 US dollars /KG, and the price of saccharin sodium is stable in the future.
