

VEGA DAILY

Vitamins to VEGA!

6th. March. 2024

VITAMIN/ Vitamin E 50%

01

According to market news, BASF significantly increased its quotation for vitamin E 50% feed grade to USD12.5/KG on March 5. Among the three major domestic manufacturers in the export market, two have stopped quoting and accepting orders, and the other has limited orders. At present, the supply of goods in export channels is very small, and the terminal inventory is also low. Focus on the new quotations and order signings of each factory.

AMINO ACID/ Isoleucine

02

The market quotation is between USD4.8-37.5/KG, and the price is at a low level. Currently, the overall market demand is average. End users purchase according to demand. It is expected that the price of isoleucine will be stable or a bit weak in the short term.

API

03

Recently, the environmental impact assessment document of Zhejiang Supor Pharmaceutical Co., Ltd.'s high-end API green synthesis industrialization construction project was announced on relevant websites. The project will build new workshops, warehouses, control buildings, fire pump rooms and other buildings (structures), and purchase reactors and other equipment. Forming an annual output of 612 tons of raw materials (including 18 types of tinidazole, ornidazole, secnidazole, hydroxychloroquine sulfate, pregabalin, etc.) and 20 tons of intermediates (including ibrutinib intermediates and lamotrigine. It has the production capacity of 2 kinds of oxazine intermediates), and uses the output intermediates to recycle and produce ammonium sulfate, polyaluminum chloride, sodium bromide, acetonitrile and ethanol by-products. The public announcement period is from March 4, 2024 to March 11, 2024 (5 working days).

FOOD ADDITIVE

04
