Vitamins to VEGA!

30th. Apr. 2024

## VITAMIN

01

ZMC announced on April 29: At 19:47 on April 28, 2024, the buffer tank of the exhaust gas system in the company's carotenoid intermediate production workshop flashed, with no casualties and small direct economic losses. The company's production and operation are normal. Affected by the news on the night of April 28, although ZMC finally announced that the impact was small, the market opinion was constantly expanding. In addition, the inventory of VA VE products in the market was extremely small. There was a period of weak and stable operation in the early stage. The sudden incident was like a frightened bird to the market, and the market attention increased sharply.

## AMINO ACID

02

The transaction volume of lysine hydrochloride market is weak, the market quotation of traders has been slightly reduced, the signing sentiment of end users is weak, most factory orders are signed until June, mainly for delivery, and the factory profits are good. Recently, Henan Jinyufeng lysine project was successfully started up, and we will pay attention to the factory quotation situation in the future.

## API

03

Enrofloxacin/Ciprofloxacin Hydrochloride: The quotations from mainstream domestic factories have been stable recently. The market demand for Enrofloxacin and Ciprofloxacin Hydrochloride is weak at present, and we will continue to pay attention to the market transaction situation in the future.

## FOOD ADDITIVE

04

Recently, the food additive anhydrous saccharin sodium has been affected by market demand. The transaction price in the domestic market has been adjusted to around 46/KG, and the transaction price in the foreign market is around 5.4-5.6 US dollars/KG. In the short term, the price of anhydrous saccharin sodium will stabilize.
