VITAMIN

01

Shandong FY Feed Technology Co., Ltd. plans to invest USD 19.01 million to build a new VB2 quality optimization and upgrading workshop on its existing site and refine crude VB2 to achieve an annual output of 1,000 tons of 98% vitamin B2. The project will reuse one idle spray drying tower from the 80% VB2 production line, eliminate 18 outdated sets of equipment, and upgrade the same model units of its 1,500 tons 80% VB2 production line.

On October 1, 2025, Royal De Heus signed an agreement to acquire CJ Feed & Care's 17 feed mills in Vietnam, Indonesia, South Korea, Cambodia, and the Philippines. The deal will expand De Heus' footprint in Southeast Asia and open new markets in South Korea and the Philippines. Completion is expected in the first half of 2026, pending regulatory approval..

AMINO ACID

02

Ningxia Eppen Biotech Co., Ltd. has adopted a new bacterial strain that increases acid production efficiency by 2.5 times, boosting its annual L-arginine capacity to 10,000 tons. The company is upgrading its existing L-arginine production line to produce feed-grade L-arginine, with a total investment of USD 9.23 million, including USD 0.13 million in environmental protection measures (1.37% of the total). The construction period is estimated at three months.

API

03

On October 9, Zhejiang Hisun Pharmaceutical Co., Ltd. announced that its product S-Adenosyl-L-methionine 1,4-butanedisulfonate passed the U.S. FDA Self-GRAS certification, officially gaining market access in the United States as a safe, high-value nutritional fortifier.

FOOD ADDITIVE

04

According to Reuters, Mondelez International is accelerating its plan to replace synthetic colors with natural ones in the U.S. market, targeting full completion by the end of 2026 in response to the FDA's ban on eight petroleum-based dyes. This move revives its 2015 "no artificial colors" pledge and reflects the food industry's shift toward healthier, clean-label products.
