## VITAMIN

01

On October 16, market sources reported that Hebei Yuwei Biotechnology Co., Ltd. has suspended its global inositol quotations effective immediately. Since September, inositol supply has remained tight. Leading factories previously raised their offers to USD 3.74/KG, while transaction prices climbed from the previous bottom range of USD 2.74/KG-3.00/KG to around USD 3.49/KG — an increase of over 20%. Some orders have already been signed at USD 3.74. Given current conditions, the market shows a clear upward momentum, and it is possible that other manufacturers may also suspend quotations or further increase prices.

## AMINO ACID

02

On October 16, 2025, the European Food Safety Authority (EFSA) published a scientific opinion confirming that L-threonine, produced by Anhui Huaheng Biotechnology Co., Ltd. via fermentation using E. coli strain CCTCC M 2024477 and submitted by Kempex Holland, is safe and effective as a feed additive for all animal species.

## API

03

This week, both lead times and prices for Tylosin Tartrate and Tilmicosin Phosphate have continued to tighten among major producers. Market inquiries remain active, and transaction prices are expected to reach new highs for the year. Current factory quotations are around USD 37.4/KG for Tylosin Tartrate and USD 42.4/KG for Tilmicosin Phosphate. Further tightening in supply and delivery schedules is anticipated, warranting close attention.

## FOOD ADDITIVE

04

Recently, due to tight delivery schedules, several major creatine manufacturers have suspended quotations. The market remains generally stable with no significant price fluctuations expected in the short term.
