## VITAMIN

01

According to market sources, starting March 12, Zhucheng Haotian Pharm Co., Ltd. and Hebei Yuwei Biotechnology Co., Ltd. suspended quotations for inositol products. Meanwhile, some producers raised contract prices to USD 5.86/kg, with mainstream brand transaction prices rising to above USD 5.21/kg.

## AMINO ACID

02

Tryptophan market quotations remain firm, with some producers having orders booked through late April and currently focusing on deliveries. End-user inventories are around two months, and some buyers have adopted a wait-and-see approach following recent price increases. Prices are expected to remain stable to slightly firm in the near term.

## API

03

Doxycycline hydrochloride has recently attracted increased market attention amid international market developments, with prices showing signs of stabilization and rebound. However, with new production capacities entering the market, prices are expected to fluctuate within a range in the near term. Current transaction levels for doxycycline are around USD 42.3/kg.

## FOOD ADDITIVE

04

- Sucralose prices are supported by rising upstream raw material costs, including DMF, trichloroethane, and thionyl chloride. Current domestic transaction prices are around USD 12.23–12.36/kg, with tight delivery schedules among major producers. Prices may continue to rise depending on supply conditions.
