VITAMIN

01

This week, major vitamin K3 producers suspended quotations and order signing, with continued tight deliveries. Supported by rising raw material expectations, low-price selling interest remains limited, and the market stays firm.

AMINO ACID

02

On March 17, Henan Jinyufeng Biotechnology Co., Ltd. increased lysine quotations to USD 676/MT for 70% lysine and USD 1028/MT for 98.5% lysine, while other corn by-products remain on inquiry basis.

API

03

Oxytetracycline HCl prices have been raised by producers due to raw material cost fluctuations, with current market transactions around USD 12.5–13/kg. Prices are expected to remain firm in the short term, with further movements depending on raw material costs, production, and demand.

FOOD ADDITIVE

04

Creatine monohydrate prices have increased due to raw material and market factors, with current producer quotations around USD 3.25–3.38/kg and delivery schedules extending to mid-to-late April. Further price increases remain possible.
