VITAMIN

01

The Vitamin C market remains firm, with producers raising quotations to USD 3.21/kg, driving transaction prices up to USD 2.5–2.7/kg, indicating a clear upward shift in price levels.

AMINO ACID

02

Recently, INNOBIO (Heilongjiang) Limited launched a USD 50 million expansion project at its Fujin site, adding a flexible production line capable of switching between isoleucine and tryptophan, with a total capacity of 26,000 MT/year. The project has entered the environmental approval stage.

API

03

- Florfenicol supply remains tight, with active demand but limited spot availability. Current prices are around USD 21.5-22.2/kg, with a slightly firm outlook in the near term.
- Separately, Aba Chemicals Corporation plans to raise up to USD 147.79 million to invest in pharmaceutical and agrochemical intermediates, API projects, and R&D expansion.

FOOD ADDITIVE

04

- Taurine prices continue to rise due to higher raw material costs, with mainstream quotations around USD 3.6/kg. Supply is tight and spot availability limited, supporting a firm short-term outlook.
- Meanwhile, Chinese authorities have launched a nationwide inspection campaign on cross-border health food e-commerce, targeting false origin claims and misleading health statements. The initiative is expected to strengthen market compliance and improve the competitive environment for legitimate brands.
