VITAMIN

01

According to market sources, starting from May 18, ZMC updated its latest contract price for feed-grade vitamin E powder to USD 15.62/KG under limited contract signing. Xinfu Pharmaceutical also raised its quotation for feed-grade vitamin E to USD 15.62/KG.

AMINO ACID

02

According to patent information published by the China National Intellectual Property Administration on May 8 (Publication No. CN121992045A), AHB-Anhui Huaheng Biotechnology and AHB-Hefei Huaheng Biotechnology Engineering jointly developed a new fermentation optimization technology. By adjusting the redox potential during fermentation, the technology significantly improves the isoleucine-to-valine ratio, helping reduce downstream separation and purification difficulty as well as production costs.

API

03

Recently, the environmental impact assessment documents for Saintchem's 30,300 MT fine chemicals project entered the public announcement stage, starting from May 15, 2026, with a disclosure period of 10 working days. The project plans to invest approximately USD 38.08 million and will include production facilities for several fine chemical products, including acetoxyacetyl chloride, L-acetoxypropionyl chloride, methoxyacetyl chloride, furoyl chloride, BSTFA, and BSA.

FOOD ADDITIVE

04

According to information from the China National Intellectual Property Administration, the patent jointly filed by Angel Yeast and Angel Nutritech for a "compound probiotic preparation for reducing harmful intestinal gas production and regulating gut microbiota" has been officially granted. The probiotic formulation combines Bifidobacterium animalis subsp. lactis Bi66, Lactobacillus plantarum P16, and Saccharomyces boulardii Bld-3, helping increase beneficial short-chain fatty acids while reducing harmful gases such as NH_3 and H_2S .
