VITAMIN

01

Recently, China Zhenhua (Group) Science & Technology Co., Ltd. received a patent for “A Method for Producing Chromium Oxide Green Using Chromium-Containing Waste Sludge.” The technology improves chromium recovery efficiency through waste resource utilization, while reducing production costs and providing a new approach for green manufacturing and circular economy development.

AMINO ACID

02

The tryptophan market remains weak but stable, with producer quotations at USD 3.64–3.77/KG. Some lower-priced transactions were observed in the trading market, while downstream demand and replenishment activity remained limited. Maintenance at some producers provides partial supply support, and prices are expected to remain stable with a weak trend in the short term.

API

03

- On July 8, Sino Biopharmaceutical announced that it had granted overseas rights of its independently developed COPD innovative drug TQC3721 (PDE3/4 inhibitor) to AstraZeneca in a deal worth up to USD 1.9 billion, marking the company’s second major BD transaction this year.
- Meanwhile, Vland Biotech Group announced that its subsidiary Qingdao Continent Animal Pharmaceutical Co., Ltd.’s jointly developed chlorhexidine acetate solution has been approved by Chinese Ministry of Agriculture and Rural Affairs as a Class III new veterinary drug and received the New Veterinary Drug Registration Certificate.

FOOD ADDITIVE

04

Recently, Sirio Pharma Co., Ltd. received a patent related to “Lactiplantibacillus plantarum SP055, its postbiotics, and applications for maintaining blood glucose and lipid health.” The technology expands the potential applications of probiotics and postbiotics in health management and functional nutrition.
