VITAMIN

01

Garden Biopharmaceutical recently obtained both the EU Active Substance Certificate and Certificate of Pharmaceutical Product (CPP) for Vitamin D3. The certifications provide a compliance basis for exporting its API products to the EU and other international markets, marking an important step in the company's global expansion.

AMINO ACID

02

- On September 4 U.S. Eastern Time, the USITC issued its final affirmative injury determination on L-Lysine, confirming that Chinese L-Lysine has caused material injury to the U.S. domestic industry. The anti-dumping and countervailing duty orders are scheduled to take effect upon publication in the Federal Register on September 8, with combined duty rates varying significantly by producer and reaching up to 211%.
- Adisseo's Nanjing liquid Methionine plant is expected to undergo maintenance in Q4 2026, with the market anticipating a possible start in October. The timing and duration remain subject to adjustment, and further updates should be monitored.

API

03

On September 7, Hisun Pharmaceutical announced that its subsidiary Zhejiang Hisun Animal Health Co., Ltd. had received approval for a new veterinary drug registration certificate for a compound Fipronil, Praziquantel and Moxidectin spot-on. The product is approved as a Class IV new veterinary drug for the prevention and treatment of internal and external parasite infections in cats.

FOOD ADDITIVE

04

Creatine Monohydrate prices have strengthened amid rising costs of raw materials such as Methylamine and Chloroacetic Acid. Some producers have suspended quotations, while current prices have increased to around USD 3.04-3.2/KG, with delivery schedules extending into late September. Prices are expected to remain on an upward trend in the near term.
