Vitamins to VEGA!

14th. November. 2024

## VITAMIN

01

On November 13, domestic folic acid manufacturers chose to stop reporting and signing, resulting in a significant increase in market inquiry activities. Subsequently, the market trend quickly changed to a wait-and-see attitude, and dealers were reluctant to sell existing supplies. Even if there are a small number of old goods undergoing trial transactions, their prices have climbed to the USD23-24/KG range. At the same time, there are almost no first-line brands with fresh factory dates circulating in the market.

## AMINO ACID

02

Recently: According to the relevant requirements of the "Regulations on Environmental Protection Management of Construction Projects" (State Council Order (2017) No. 682) and the "Interim Measures for Environmental Protection Acceptance of Completed Construction Projects" (National Environmental Protection Assessment (2017) No. 4), XJ (Shenyang) Biotechnology Co., Ltd. will publish the environmental protection acceptance survey report and acceptance opinions on the completion of the 60,000 tons/year arginine production project alternately. The publicity period is: November 11, 2024 - December 6, 2024.

## API

03

The factory delivery situation of florfenicol continues to be tight, and the delivery time of most orders has been postponed to December, and some are even postponed to after January. Due to the scarcity of spot inventory in the market, customers' price acceptance has increased significantly. Currently, the market price of florfenicol is between USD23.5-24/KG. The florfenicol market is expected to maintain a continued strong trend.

## FOOD ADDITIVE

04

Today, the food additive acesulfame potassium is affected by market demand, and the market transaction price is around USD4.8/KG. In the short term, the price will remain stable.
