## VITAMIN

01

Recently, the China Patent Protection Association announced the "2024 Patent-Intensive Products List", and Zhucheng Haotian Pharmaceutical Co., Ltd.'s products "Inositol" and "Baicalin" are among them. Patent-intensive products refer to products that mainly bring market competitive advantages due to the patents used, reflecting the market contribution of patents to products, and can provide basic support for the company's asset evaluation, project application, and scientific and technological innovation.

## AMINO ACID

02

According to market news: Degussa Southeast Asia plans to increase the price of methionine by 10%. The recent quotations from methionine factories are strong and the prices are at a relatively high level. End users should purchase cautiously on demand and pay attention to the market order signing situation and factory delivery progress in the future.

## API

03

According to the EU Official Gazette, on January 30, 2025, the European Commission issued Regulation (EU) 2025/148 to extend the authorization period of Enterococcus lactis NCIMB 11181 as a feed additive for weaned piglets, fattening calves and rearing calves. According to the conditions specified in the annex, this additive is authorized as an animal additive in the category of "technical additives" and the functional group is "intestinal flora stabilizer". The authorization ends on February 19, 2035.

## FOOD ADDITIVE

04

Recently, the Hangzhou Ecological Environment Bureau accepted and publicized the environmental impact assessment document of "Hangzhou Xiyuan Biotechnology Co., Ltd.'s annual production of 300kg/a of cross-linked sodium hyaluronate, 100kg/a of fermented sodium chondroitin, and 400kg/a of medical device-grade sodium chondroitin sulfate".

The project is planned to be built in Hongshan Farm (GMP workshop 1) in Xiaoshan District, Hangzhou City, Zhejiang Province. After the project is completed and put into operation, it will form an annual production scale of 300kg of cross-linked sodium hyaluronate, 100kg of fermented sodium chondroitin, and 400kg of medical device-grade sodium chondroitin sulfate.
