VITAMIN

01

According to market news, Zhejiang Medicine stopped quoting feed-grade vitamin A and vitamin E from February 24, and raised the price of vitamin D3 to USD 46/kg. Previously, Zhejiang Medicine's vitamin product prices were relatively high; in the export market, VA 1000 was quoted at USD 35, VE 50% was quoted at USD 18, and VD3 500 was quoted at USD 35; since the beginning of the year, many domestic and foreign customers have been waiting for normal quotations from mainstream factories before purchasing; however, after three weeks of waiting, Zhejiang Medicine stopped quoting; affected by this news, the attention and inquiries in the VE and VD3 markets increased significantly, while the VA market remained stable for the time being.

AMINO ACID

02

Tryptophan: Manufacturers' quotations are stable, and actual inquiries in the trade market are average, with quotations around USD 7.03/KG. At present, the production of enterprises remains stable, mainly delivering early orders, with few inquiries from end users and few spot goods in some trades. Pay attention to the signing of orders and upstream shipments. It is expected that the price of tryptophan will remain stable with a slight weak adjustment.

API

03

SJZ No.4 Pharmaceutical announced that its piribedil has been approved by the China National Drug Administration to be registered as a raw material for use in marketed preparations, making it the third domestic company to be approved. Piribedil is mainly used to treat Parkinson's disease and circulatory disorders.

Apramycin sulfate, the mainstream manufacturers have recently offered strong prices, factory delivery is tight, there is little spot in the market, and it has received a lot of attention. The current market price is USD 26.2-27.5/kg, and it is expected to remain strong in the near future.

FOOD ADDITIVE

04

Recently, affected by the market situation and the supply of raw material propylene oxide, the prices of carnitine series this week are as follows:

Carnitine Base, mainstream manufacturers' quotation range: USD 20.5-21.7/KG;

L-carnitine hydrochloride, mainstream manufacturers' quotation range: USD 22.4-23.6/KG;

L-carnitine tartrate, mainstream manufacturers' quotation range: USD 19.2-20.5/KG.

The prices of carnitine series products are expected to rise in the future, and we will continue to pay attention to the market situation.
