VITAMIN

01

Recently, KDW announced that the company and its subsidiaries Inner Mongolia Kingdomway Pharmaceutical Limited, Jiangsu Chengxin Pharmaceutical Co., Ltd. and Kingdomway (Jiangsu) Biotech Co., Ltd. recently received an invention patent certificate issued by the United States Patent and Trademark Office. The invention name is "PROCESSES FOR PRODUCING REDUCED COENZYME Q10 (Production process of reduced coenzyme Q10)".

AMINO ACID

02

Threonine: Manufacturers' quotations are temporarily stable, with the trade market quoting USD 1.2-1.3/kg, and the market is sluggish. Currently, the price has fallen to a low level, and the factory's sentiment to support the price is gradually rising. The quotation is stable, and some end users have begun to purchase, mainly for just-in-time orders. The market price has stopped falling, and attention should be paid to the progress of subsequent factory orders.

API

03

Enrofloxacin/Ciprofloxacin Hydrochloride: The supply of raw materials has been tight recently, and the delivery of mainstream domestic factories has become tighter. The quotations have been slightly raised. The export transaction of enrofloxacin above tonnage level is around USD 22.4-23.6/KG. The transaction of ciprofloxacin hydrochloride is USD 23-23.4/KG. The market of Enrofloxacin and Ciprofloxacin Hydrochloride is tight at present, and there is a trend of price increase in the future. We will continue to pay attention to the market transaction situation.

FOOD ADDITIVE

04

The price of potassium sorbate, a preservative product, has remained stable recently, and all manufacturers have delivered goods normally. The transaction price of potassium sorbate in the foreign market is around USD 2.3-2.4/KG. The possibility of price increases in the future cannot be ruled out.
