## VITAMIN

01

Research shows that 45% of Alzheimer's disease cases are preventable. Supplementing brain vitamins in advance can effectively prevent brain aging and reduce the risk of cognitive impairment. Brain vitamins refer to a series of vitamins and related minerals that play an important role in supporting normal brain function and health, such as chromium, selenium, B vitamins (B1, B2, B3, B6, B12, folic acid), vitamin E, zinc, etc. These nutrients play a crucial role in combating brain cell aging, removing waste to protect nerves, and providing metabolic energy for cellular systems.

## AMINO ACID

02

Threonine: Domestic manufacturers have slightly increased their quotations, and the market sentiment for price increases is strong. Prices are currently at relatively low levels. Some factories are selling threonine in combination with other products, and the overall market signing of threonine orders is relatively active. However, some players remain watchful, paying attention to downstream market transactions.

## API

03

Tylomycin, Timicosin phosphate, there are mainstream manufacturers to stop the external quotation to stop signing, suspected to be affected by production cuts and market demand, this week, customer inquiries are positive prices, limited market stock, prices are expected to be adjusted, please pay attention. The market price of wine Thai powder before stopping is \$30.1 /kg, \$34.6 /kg for Timicosin phosphate and 315 yuan /kg for timicine.

## FOOD ADDITIVE

04

Recently, Angelyeast announced that its subsidiary, Indonesia Company, plans to invest 880 million yuan in constructing a project with an annual production capacity of 20,000 tons of yeast. This project will further strengthen the development of the Indonesian yeast market.
