

VEGA DAILY

Vitamins to VEGA!

6th. February, 2025

VITAMIN I

01

Vitamin market was stable during the holiday, nicotinamide factory quotation went down before the holiday, market price also went down, B1, B6 supply continues to be tight, low price inventory was consumed, market price rose slowly; VE, D3 manufacturers quotation is firm, market transactions was active; In addition, the impact of the new tariff of 10% in North America will affect the price of vitamins in the local market in the future. According to the news from overseas markets, the DSM Vitamin E plant in Sisseln, Switzerland will be suspended for two weeks, the exact cause has not been disclosed.

AMINO ACID I Lysine

02

Recently, the market price of 98% lysine is weak, and the factory's external quotation is reduced, because of the domestic Spring Festival holiday, the export signing is not ideal, the factory orders are relatively reduced, and the delivery pressure is relieved. The end users are cautious in signing orders due to the weak market in the later period, and they are mainly watching and waiting. It is expected that the 98% lysine market is weak in the short term, and the factory signing progress after the holiday is concerned in the later period.

API I

03

Pharscin Pharma obtained the first registration certificate of formula food for Special medical use, and the generic name of the certified product is protein component formula food for special Medical use, which is designed for people over 10 years of age who need accurate protein supplementation for specific diseases or medical conditions such as hypoproteinemia, perioperative, burn, infection, and tumor.

FOOD ADDITIVE I Creatine Monohydrate

04

Nutrient fortifier products creatine monohydrate, the current mainstream factory goods have been discharged to late February, the domestic market transaction price is stable to USD3.2-3.6/kg, at present, the market volume is weak, the future short-term forecast creatine monohydrate price trend bearish.
