VITAMIN

01

BASF Animal Nutrition publicly stated on its social media on March 12, that the restart of vitamin E production is scheduled for mid-May; as mentioned earlier, it will take several weeks to months to ensure "business as usual", including replenishing global, regional and local inventory levels.

Recently, Hubei Shenmao Biotechnology Co., Ltd. announced the construction of a new D-calcium Pantothenate project. The total investment amount is 6.85 million dollars, with a total area of 13,030.58 square meters. The annual capacity can be around 700 tons after completion.

AMINO ACID

02

The latest quotation from XMXYG Biochemical's for Threonine this week is 1200 USD/MT and the price of Tryptophan is around 6.7USD/KG.

API

03

For Oxytetracycline Hydrochloride, the delivery of mainstream factories has been tight recently. The current market transaction price is 11.5-12USD/KG. The price is expected to remain strong in the short term.

FOOD ADDITIVE

04

The transaction price of Anhydrous Saccharin Sodium has stabilized at around 5-5.3USD/KG in the domestic market recently, while the price in the foreign market is around US\$5-5.5/KG, and the price will stabilize in the short term.
