3rd.April, 2025

VITAMIN | Vitamin E

01

On April 2, according to market feedback, after NHU signed a limited order for feed-grade vitamin E at USD16.6/kg; on April 1, ZMC stopped quoting and signing orders for the domestic market on the afternoon of April 2.

AMINO ACID | Tryptophan

02

Tryptophan: At present, the terminal demand remains weak, the market transaction is relatively small, the manufacturers and the trade market offer prices are lowered, and the market signing price is slightly lower to USD6065-6195/MT. The market supply is sufficient, and the soybean meal price continues to weaken. Downstream users are less enthusiastic about replenishing orders, and the transaction is relatively small. Pay attention to the market transaction. It is expected that the price of tryptophan will continue to be weak.

API | Enrofloxacin

03

Enrofloxacin/Ciprofloxacin Hydrochloride: The delivery of mainstream domestic factories has been tightened recently, and the market price is firm. The export price of Enrofloxacin above tonnage level is USD22-23.5/KG. The price of Ciprofloxacin Hydrochloride is USD22.7-24/KG. With the increasing market attention, it is expected to maintain a strong performance in the near future.

FOOD ADDITIVE | Creatine mono

04

For the nutritional supplement product creatine monohydrate, the current mainstream factories have already arranged their shipments until mid-to-late April, and the domestic market transaction price has stabilized at USD3.3-3.6/kg. At this stage, the market is booming, and the possibility of price increases for creatine monohydrate cannot be ruled out in the short term.
