VITAMIN

01

This month, the Vitamin K3 market has stabilized after a period of decline. Earlier price drops were driven by weak demand, but with raw material costs rising this month, manufacturers are showing a strong willingness to hold prices, and deliveries are tight.

AMINO ACID

02

Arginine quotations have seen a slight downward adjustment to USD 2.80–2.93/kg. Overall inquiries have decreased, terminal demand remains weak, and buying sentiment is low, leading to moderate transaction volumes. The short-term market outlook remains weak.

API

03

In August, doxycycline hydrochloride prices have shown no significant increase. Current price fluctuations are mainly due to high-temperature factory shutdowns for maintenance and rising upstream raw material costs. Market inquiries remain active, with recent transactions around USD 44.25–44.87. The market trend warrants close monitoring.

FOOD ADDITIVE

04

Recently, the L-Carnitine series has shown upward price momentum, with this week's mainstream quotations as follows:

- L-Carnitine Base: USD 20–21.20/kg
- L-Carnitine Hydrochloride: USD 21.81–23.06/kg
- L-Carnitine Tartrate: USD 18.70–20/kg

Some factories have halted production for maintenance, supporting a bullish price outlook for the L-Carnitine series. We will continue to monitor market developments.
