VITAMIN

01

Currently, vitamin E transaction prices are around USD 7.05-7.18/kg. When prices lower than USD7.05/kg, producers and distributors show limited willingness to sell, resulting in tight spot availability. Overall market inventories remain low. After the Spring Festival, replenishment demand is expected to support price increases, with fewer low-priced offers available.

AMINO ACID

02

According to market sources, NHU implemented an 8% price increase on solid methionine effective February 3. Market participants are closely watching downstream acceptance and transaction levels.

API

03

The doxycycline hydrochloride market remains cautious, with major producers maintaining firm pricing while allowing negotiated transactions. Overall deal prices have remained stable. Doxycycline prices are currently around USD 40/kg, and short-term market performance is expected to fluctuate within a narrow range.

FOOD ADDITIVE

04

Driven by current market conditions, prices across the carnitine series remained stable this week. Mainstream quotations are as follows:

- Carnitine Base: USD 25.65–26.93/KG
- Acetyl-L-Carnitine HCl: USD 26.93–28.22/KG
- L-Carnitine Tartrate: USD 24.37–25.65/KG

Prices are expected to remain stable in the short term, with ongoing monitoring of market developments.
