VITAMIN

01

Feed-grade Vitamin E 50% is largely under quotation suspension, reflecting tight availability. FOB transaction prices have risen to USD 6.8–7/KG. Supported by supply control and low inventory levels, further price increases are likely after the Spring Festival.

AMINO ACID

02

Arginine prices remain stable ahead of the holiday, with limited trading activity. Current levels are USD 2.76–2.89/KG. Downstream restocking has largely concluded, and producers focus on order execution. With logistics gradually slowing before the Spring Festival, prices are expected to stay stable in the short term.

API

03

Enrofloxacin and Ciprofloxacin HCl remain at bottom-level consolidation:

- Enrofloxacin (bulk volumes): USD 20.26–20.91/KG
- Ciprofloxacin HCl: USD 17.96–19.24/KG

Supply remains stable, and prices are expected to stay at low levels in the near term, pending demand changes before and after the Spring Festival.
