## VITAMIN

01

Mainstream Inositol producers maintained firm quotations, with limited market inventory and downstream purchasing mainly driven by immediate demand. Negotiated transactions were observed in the market. Current quotations remain at USD 6.6–7.3/KG, and prices are expected to stay stable in the near term.

## AMINO ACID

02

FUFENG GROUP recently disclosed a patent for the construction of a high-yield L-Tryptophan production strain. The technology improves metabolic efficiency by deleting the *cysK* gene, redirecting carbon flux toward the Tryptophan biosynthesis pathway and enhancing production performance.

## API

03

Oxytetracycline HCl demand has weakened recently, with market transaction prices remaining around USD 12.3–13/KG. The market is expected to remain stable in the short term, with future trends depending on downstream demand and producer maintenance schedules.

China Animal Husbandry Industry Co., Ltd. announced that several Foot-and-Mouth Disease vaccine products produced by its Lanzhou Biological Pharmaceutical Plant have received approval from China's Ministry of Agriculture and Rural Affairs, further expanding its veterinary vaccine portfolio.

## FOOD ADDITIVE

04

Baihe Biotechnology recently filed a patent application for a “Life-cycle Precision Nutrition Package and Its Application.” The solution is designed for women's health management across different life stages, covering nutritional support, skin health, reproductive health, sleep and emotional wellness, and metabolic regulation.
