VITAMIN

01

Recently, new Folic Acid suppliers have increased shipments, while overall demand remains relatively weak. Mainstream producers continue to maintain firm pricing, with first-tier brands quoted at around USD 40–42.3/KG. Prices from smaller brands remain more flexible, generally ranging from USD 34.4–37/KG. Future market trends will depend on producers' shipment strategies and inventory levels.

AMINO ACID

02

According to the latest update from XMYG Biochemical, effective immediately, Threonine is quoted at USD 1,050/MT, while Tryptophan is quoted at USD 4,030/MT.

API

03

- Colistin Sulfate prices remain firm, supported by tight supply from major producers. Some suppliers' production schedules have been extended to September. Current market prices are around USD 15–15.2/KG, with the market expected to remain stable with a firm trend.
- Meanwhile, Tuoxin Pharmaceutical Co., Ltd. announced that its subsidiary has received a Drug GMP Compliance Inspection Notice from the Henan Provincial Medical Products Administration. The inspection covered production workshops and production lines for APIs including Inosine, Ribavirin, Acyclovir, and Vidarabine Monophosphate. The inspected facilities were confirmed to comply with the requirements of China's Good Manufacturing Practice (GMP) standards.

FOOD ADDITIVE

04

Sucralose market prices remain stable amid ongoing competition. Current domestic transaction prices are around USD 12.3–12.55/KG, while major producers are experiencing tight order schedules. Further price increases remain possible depending on market supply and raw material trends.
