VITAMIN

01

Xinjiang Yilihong Bio-New Materials Technology Co., Ltd. announced that Phase I of its Riboflavin (Vitamin B2) production quality upgrade project passed environmental protection acceptance and entered the public disclosure period on October 12, 2026, through November 6. The project upgrades production processes and adds crystallization tanks to improve product purity and reduce refining costs. It also uses surplus starch slurry to produce dried starch.

AMINO ACID

02

Some Threonine producers have recently raised quotations, but market response remains subdued, with most buyers adopting a wait-and-see approach. FOB quotations are around USD 920–940/MT.

API

03

- Florfenicol prices have remained firm following producers' price increases in September. Low-priced supply is gradually shrinking, while inquiries and procurement interest have improved, mainly driven by essential downstream demand. Current producer quotations stand at USD 23.15-23.81/kg, with prices expected to remain stable in the near term.
- China Animal Husbandry Industry Co., Ltd. announced the acquisition of a 51% stake in Hebei Shengxue Dacheng Pharmaceutical and a 72.7272% stake in Inner Mongolia Shengxue Dacheng Pharmaceutical for a total consideration of approximately USD 108.67 million. The equity transfers and business registration changes have been completed, making the company the controlling shareholder of both businesses. The acquisition is expected to strengthen in-house veterinary API supply, broaden its product portfolio, and support international expansion.

FOOD ADDITIVE

04

Sucralose prices are being influenced by rising costs of key raw materials, including thionyl chloride and DMF, alongside competitive market dynamics. Domestic transaction prices remain around USD 12.43-12.57/kg. Leading producers face tight order schedules, and further price increases remain possible.
