VITAMIN 01

- Vitamin K3 prices recently stabilized following increases in raw material costs and foreign exchange fluctuations. Purchasing activity improved, while producers faced tighter delivery schedules. Current quotations stood at USD 8.72–8.85/kg for MSB and USD 10.00–10.20/kg for MNB. Prices are expected to remain firm in the short term, with limited downside potential.
- On November 9, Tech-Bank Food announced that Tongwei had been selected as its restructuring investor and would become its controlling shareholder upon completion of the restructuring. The investment marks a strategic move by Tongwei Group to expand its presence in the agricultural and food industry, bringing potential long-term industrial support to Tech-Bank's business development.

AMINO ACID 02

- On November 9, Wanlirunda Biotechnology announced that it was conducting trial production on its Threonine production line and had suspended Lysine quotations.
- On the same day, NHU raised its Solid Methionine quotation to USD 3.55/kg.

API 03

- Menovo Pharmaceutical announced that its subsidiary, Xuancheng Menovo Pharmaceutical, received an FDA Establishment Inspection Report on November 4, confirming that it had passed the cGMP on-site inspection for its Tildipirosin API.
- Amoxicillin major producers raised their quotations again, pushing market prices to around USD 24.50–25.00/kg. Market inquiries and trading-channel interest remained active, while end users continued to purchase based on immediate needs. Producer supply conditions remain a key factor to watch.

FOOD ADDITIVE 04

Sodium Saccharin Anhydrous prices increased due to rising upstream raw material costs and tight supply. Current market prices stood at around USD 6.30–6.40/kg, with producers' order schedules fully booked. Prices are expected to remain firm in the near term.
